Contents of Volume 194, No. 1

Protein Biosynthesis/Molecular Genetics

Association of initiation factor eIF-2 with a rapidly sedimenting fraction from Ehrlich ascites-tumour cells	M. J. CLEMENS & V. M. PAIN	357–360

Protein Turnover

Metabolism of myosin heavy chain in steady-state chick skeletal muscle cultures	R. B. YOUNG & O. C. DOMBROSKE	241–247
Equilibration of leucine between the plasma compartment and leucyl-tRNA in the heart, and turnover of cardiac myosin heavy chain	A. W. EVERETT, G. PRIOR & R. ZAK	365–368
Rates of protein synthesis in skin and bone, and their importance in the assessment of protein degradation in the perfused rat hemicorpus	V. R. PREEDY & P. J. GARLICK	373–376

Metabolism, Regulation and Control Processes

Sex differences in hepatic oestrogen-binding proteins	C. THOMPSON, W. POWELL-JONES & G. W. LUCIER	1–8
Receptor-mediated gonadotropin action in the ovary. Action of cytoskeletal element-disrupting agents on gonadotropin-induced steroidogenesis in rat luteal cells	S. AZHAR & K. M. J. MENON	19–27
Increased activity of phosphate-dependent glutaminase in liver mitochondria as a result of glucagon treatment of rats	J. H. LACEY, N. M. BRADFORD, S. K. JOSEPH & J. D. MCGIVAN	29–33
The stimulation of glutamine hydrolysis in isolated rat liver mitochondria by Mg^{2+} depletion and hypo-osmotic incubation conditions	S. K. JOSEPH, J. D. MCGIVAN & A. J. MEIJER	35–41
The relationship between the activity of DNA-dependent RNA polymerase I and the rate of synthesis of rRNA in hepatoma cells in culture	E. A. THOMPSON, JR., R. H. KEITH, JR., A. H. CAVANAUGH & K. M. WOOD	43–51
Formation of the A/B *cis* ring junction of ecdysteroids in the locust, *Schistocerca gregaria*	T. G. DAVIES, L. N. DINAN, W. J. S. LOCKLEY, H. H. REES & T. W. GOODWIN	53–62
Effects of inhibitors of spermidine and spermine synthesis on polyamine concentrations and growth of transformed mouse fibroblasts	A. E. PEGG, R. T. BORCHARDT & J. K. COWARD	79–89
Dependence on androgens of the specific DNA-binding activity of rat ventral-prostate non-histone chromosomal proteins	B. H. LESSER & N. L. ELLIOT	91–98
Vitamin D metabolism and its possible role in the developing chick embryo	M. KUBOTA, E. ABE, T. SHINKI & T. SUDA	103–109
Effect of sodium n-butyrate on induction of prostaglandin synthase activity in cloned mastocytoma P-815 2-E-6 cells	Y. KOSHIHARA, M. KAWAMURA, T. SENSHU & S. MUROTA	111–117
Effects of dopamine on prolactin secretion and cyclic AMP accumulation in the rat anterior pituitary gland	K. P. RAY & M. WALLIS	119–128
Ca^{2+}-dependent and Ca^{2+}-independent degradation of phosphatidylinositol in rabbit vas deferens	K. EGAWA, B. SACKTOR & T. TAKENAWA	129–136
Bile pigment synthesis in plants. Incorporation of haem into phycocyanobilin and phycobiliproteins in *Cyanidium caldarium*	S. B. BROWN, J. A. HOLROYD, R. F. TROXLER & G. D. OFFNER	137–147
α-Lactalbumin and lactose concentrations in rat milk during lactation	K. R. NICHOLAS, P. E. HARTMANN & B. L. MCDONALD	149–154
Metabolic aspects of the secretion of stored compounds from blood platelets. The effect of NaF at different pH on nucleotide metabolism and function of washed platelets	E. H. MÜRER, K. DAVENPORT, E. SIOJO & H. J. DAY	187–192
Phosphorylation of nuclear and DNA-binding proteins in proliferating and quiescent mammalian cells	E. W. GERNER, M. COSTA, D. K. HOLMES & B. E. MAGUN	193–207

The activity of creatine kinase in frog skeletal muscle studied by saturation-transfer nuclear magnetic resonance	D. G. GADIAN, G. K. RADDA, T. R. BROWN, E. M. CHANCE, M. J. DAWSON & D. R. WILKIE	215–228
A comparison of ornithine decarboxylases from normal and SV 40-transformed 3T3 mouse fibroblasts	J. M. WEISS, K. J. LEMBACH & R. J. BOUCEK, JR.	229–239
Induction of carnitine acetyltransferase by clofibrate in rat liver	B. MITTAL & C. K. R. KURUP	249–255
Modulation of 3-hydroxy-3-methylglutaryl-CoA reductase and of acyl-CoA–cholesterol acyltransferase by the transfer of non-esterified cholesterol to rat liver microsomal vesicles	K. A. MITROPOULOS, S. VENKATESAN, B. E. A. REEVES & S. BALASUBRAMANIAM	265–271
Corticotropin-(1–24)-tetracosapeptide effects protein phosphorylation and polyphosphoinositide metabolism in rat brain	J. JOLLES, H. ZWIERS, A. DEKKER, K. W. A. WIRTZ & W. H. GISPEN	283–291
Glycerolipid biosynthesis in rat adipose tissue. Influence of adipocyte size	S. C. JAMDAR, L. J. OSBORNE & J. A. ZEIGLER	293–298
Removal of glycosaminoglycans from cultures of human skin fibroblasts	P. J. GILL, J. ADLER, C. K. SILBERT & J. E. SILBERT	299–307
Age-dependent decay of cytochrome b_5 and cytochrome b_5 reductase in human erythrocytes	T. MATSUKI, M. TAMURA, M. TAKESHITA & Y. YONEYAMA	327–330
The effect of all-*trans*-retinoic acid on the synthesis of epidermal cell-surface-associated carbohydrates	I. A. KING & A. TABIOWO	341–350
The synthesis of acetylcholine by plants	B. N. SMALLMAN & A. MANECKJEE	361–364
Differential cytotoxicity of daunomycin in tumour cells is related to glutathione-dependent hydrogen peroxide metabolism	A. BOZZI, I. MAVELLI, B. MONDOVI, R. STROM & G. ROTILIO	369–372
Cell Surfaces and Receptors		
Phosphatidylinositol metabolism in rat hepatocytes stimulated by vasopressin	C. J. KIRK, R. H. MICHELL & D. A. HEMS	155–165
Stimulation of inorganic-phosphate incorporation into phosphatidylinositol in rat thoracic aorta mediated through V_1-vasopressin receptors	A. P. S. TAKHAR & C. J. KIRK	167–172
Isolation and characterization of a mannose/*N*-acetylglucosamine/fucose-binding protein from rat liver	R. TOWNSEND & P. STAHL	209–214
Cell-surface radioiodination with the sparingly soluble catalyst Iodogen. Differences between the dividing and non-dividing populations of rodent thymocytes	J. G. SALISBURY & J. M. GRAHAM	351–355
Developmental Biochemisty		
A cryptobiosis-specific 19S protein complex of *Artemia salina* gastrulae	E. DE HERDT, F. DE VOEGHT, J. CLAUWAERT, M. KONDO & H. SLEGERS	9–17
Membranes, Transport, Bioenergetics and Photosynthesis		
The role of glutathione in amino-acid absorption. Lack of correlation between glutathione turnover and amino-acid absorption by the yeast *Candida utilis*	R. J. ROBINS & D. D. DAVIES	63–70
The mechanism of palmitoyl-CoA inhibition of Ca^{2+} uptake in liver and heart mitochondria	M. C. BEATRICE & D. R. PFEIFFER	71–77
Involvement of γ-glutamyltransferase in amino-acid uptake by the lactating mammary gland of the rat	J. VIÑA, I. R. PUERTES, J. M. ESTRELA, J. R. VIÑA & J. L. GALBIS	99–102
Mannitol and glucose movement across the Golgi membrane of lactating-rat mammary gland	M. D. WHITE, N. J. KUHN & S. WARD	173–177
Oxygen-dependent 1,25-dihydroxycholecalciferol-induced calcium ion transport in rat intestine	N. C. KENDRICK, B. KABAKOFF & H. F. DELUCA	179–186
The lack of a phospholipid-exchange-protein activity in soluble fractions of *Spinacia oleracea* leaves	D. J. MURPHY & D. N. KUHN	257–264
Reduction of biliverdin and placental transfer of bilirubin and biliverdin in the pregnant guinea pig	A. F. MCDONAGH, L. A. PALMA & R. SCHMID	273–282

Phosphorylated lymphocyte plasma-membrane proteins	A. P. JOHNSTONE, J. H. DUBOIS & M. J. CRUMPTON	309–318
The effects of *N*-alkylmaleimides on the activity of rat liver glucose 6-phosphatase	B. VAKILI & M. BANNER	319–325
Extraction and partial purification of the nucleoside-transport system from human erythrocytes based on the assay of nitrobenzylthioinosine-binding activity	S. M. JARVIS & J. D. YOUNG	331–339

Contents of Volume 194, No. 2

Protein Biosynthesis/Molecular Genetics

Early effects of dimethylnitrosamine on the initiation of protein synthesis in mouse liver	O. NYGÅRD & T. HULTIN	469–474
Non-involvement of nucleolytic activities in the early effect of dimethylnitrosamine on the content of free mRNA in mouse liver	O. NYGÅRD & T. HULTIN	475–480
The presence in serum of proteins which are immunologically cross-reactive with Tamm–Horsfall glycoprotein	K. L. LYNN & R. D. MARSHALL	561–568
The nature of the microfibrillar glycoproteins of elastic fibres. A biosynthetic study	C. H. J. SEAR, M. E. GRANT & D. S. JACKSON	587–598

Metabolism, Regulation and Control Processes

Alternative substrates for triacylglycerol synthesis in isolated adipocytes of different size from the rat	A. A. FRANCENDESE & M. DIGIROLAMO	377–384
Effect of carbon source on the accumulation of cytochrome *P*-450 in the yeast *Saccharomyces cerevisiae*	S. O. KÄRENLAMPI, E. MARIN & O. O. P. HÄNNINEN	407–413
Metabolism of pent-4-enoate in rat heart. Reduction of the double bond	J. K. HILTUNEN & E. J. DAVIS	427–432
Alternative metabolic fates of thymine nucleotides in human cells	M. R. TAHERI, R. G. WICKREMASINGHE & A. V. HOFFBRAND	451–461
The relationship of phosphatidylinositol turnover to receptors and calcium-ion channels in rat parotid acinar cells	S. J. WEISS & J. W. PUTNEY, JR.	463–468
The effect of calmodulin on the phosphoprotein intermediate of Mg^{2+}-dependent Ca^{2+}-stimulated adenosine triphosphatase in human erythrocyte membranes	D. A. JEFFERY, B. D. ROUFOGALIS & S. KATZ	481–486
Activation of (arachidonyl) phosphatidylinositol turnover in rabbit neutrophils by the calcium ionophore A23187	R. P. RUBIN, L. E. SINK & R. J. FREER	497–505
The composition of intracellular granules from the metal-accumulating cells of the common garden snail (*Helix aspersa*)	B. HOWARD, P. C. H. MITCHELL, A. RITCHIE, K. SIMKISS & M. TAYLOR	507–511
The determination of lactate turnover *in vivo* with ^3H- and ^{14}C-labelled lactate. The significance of sites of tracer administration and sampling	J. KATZ, F. OKAJIMA, M. CHENOWETH & A. DUNN	513–524
Metabolism of ^3H- and ^{14}C-labelled lactate in starved rats	F. OKAJIMA, M. CHENOWETH, R. ROGNSTAD, A. DUNN & J. KATZ	525–540
Glucagon stimulation of Ruthenium Red-insensitive calcium ion transport in developing rat liver	P. H. REINHART & F. L. BYGRAVE	541–549
Direct measurement of the increase in intracellular free calcium ion concentration in response to the action of complement	A. K. CAMPBELL, R. A. DAW, M. B. HALLETT & J. P. LUZIO	551–560
Inactivation of oestrogen receptor *in vitro* by nuclear dephosphorylation	F. AURICCHIO, A. MIGLIACCIO & A. ROTONDI	569–574
Effect of cycloheximide, β-D-xylosides and β-D-galactosides on heparin biosynthesis in mouse mastocytoma	H. C. ROBINSON & U. LINDAHL	575–586
2,3-Dihydroxybenzoate pathway in *Pseudomonas putida*. ^1H n.m.r. study on the ring-cleavage site	V. ANDREONI, L. CANONICA, E. GALLI, C. GENNARI & V. TRECCANI	607–610

The binding of [^{3}H]adenosine to synaptosomal and other preparations from the mammalian brain	M. E. NEWMAN, J. PATEL & H. MCILWAIN	611–620
Cyclic AMP-binding capacities and histone kinase activation in subcellular components of neocortical tissue. Differential responses to three neurohumoural agents	J. PATEL, M. E. NEWMAN & H. MCILWAIN	621–626
Control of porphyrin biosynthesis in *Rhodopseudomonas spheroides* and *Propionibacterium shermanii*. A direct ^{13}C nuclear-magnetic-resonance spectroscopy study	G. BURTON, P. M. JORDAN, N. E. MACKENZIE, P. E. FAGERNESS & A. I. SCOTT	627–631
The activation of pyruvate dehydrogenase in the perfused rat heart by adrenaline and other inotropic agents	J. G. MCCORMACK & R. M. DENTON	639–643
Conversion of isopenicillin N into penicillin N in cell-free extracts of *Cephalosporium acremonium*	G. S. JAYATILAKE, J. A. HUDDLESTON & E. P. ABRAHAM	645–647
Cell-free conversion of isopenicillin N into deacetoxycephalosporin C by *Cephalosporium acremonium* mutant M-0198	J. E. BALDWIN, J. W. KEEPING, P. D. SINGH & C. A. VALLEJO	649–651
Cell Surfaces and Receptors		
Characterization of human somatotropin binding to detergent-solubilized lactogenic receptors from rat liver	J. S. BONIFACINO, S. H. SÁNCHEZ & A. C. PALADINI	385–394
Developmental Biochemistry		
UDP-galactose:ceramide galactosyltransferase of rat central-nervous-system myelin	O. KOUL & F. B. JUNGALWALA	633–637
Membranes, Transport, Bioenergetics and Photosynthesis		
Control of electron transfer in the cytochrome system of mitochondria by pH, transmembrane pH gradient and electrical potential. The cytochromes *b*–*c* segment	S. PAPA, M. LORUSSO, G. IZZO & F. CAPUANO	395–406
The accumulation of amino acids by mouse ascites-tumour cells. Dependence on but lack of equilibrium with the sodium-ion electrochemical gradient	C. HACKING & A. A. EDDY	415–426
Active transport of charged substrates by a proton/sugar co-transport system. Amino-sugar uptake in the yeast *Rhodotorula gracilis*	C. NIEMIETZ, R. HAUER & M. HÖFER	433–441
Cystine uptake by rat renal brush-border vesicles	P. D. MCNAMARA, L. M. PEPE & S. SEGAL	443–449
A specific role for Ca^{2+} in the oxidation of exogenous NADH by Jerusalem-artichoke (*Helianthus tuberosus*) mitochondria	I. M. MØLLER, S. P. JOHNSTON & J. M. PALMER	487–495
Oxidation–reduction properties of the cytochrome *b* found in the plasma-membrane fraction of human neutrophils. A possible oxidase in the respiratory burst	A. R. CROSS, O. T. G. JONES, A. M. HARPER & A. W. SEGAL	599–606
Changes in mitochondrial components of hamster brown adipose tissue in response to cold acclimation	M. E. YACOE	653–656

Contents of Volume 194, No. 3

Protein Biosynthesis/Molecular Genetics		
Newly biosynthesized cytochrome *P*-450 associated with the Golgi apparatus from livers of rats induced with phenobarbital	M. B. COOPER, J. A. CRAFT, D. E. REES & B. R. RABIN	691–697
Preparation and partial characterization of cell-free protein-synthesizing extracts from *Tetrahymena pyriformis*	E. T. DAVID & K. E. SMITH	761–770
Reconstitution into liposomes of membrane proteins involved in ribosome binding on rough endoplasmic reticulum. Ribosome-binding capacity	M. YAMAGUCHI, M. SAKAI, T. HORIGOME, S. OMATA & H. SUGANO	907–913
Reconstruction of the smaller subparticle of rabbit ribosomes from core-particle and split-protein fractions	R. A. COX	931–939

The construction, identification and partial characterization of plasmids containing guinea-pig milk protein complementary DNA sequences	R. K. Craig, L. Hall, D. Parker & P. N. Campbell	989–998
Differential expression of α-lactalbumin and casein genes during the onset of lactation in the guinea-pig mammary gland	L. J. Burditt, D. Parker, R. K. Craig, T. Getova & P. N. Campbell	999–1006
Phosphorylation *in vivo* of non-ribosomal proteins from native 40S ribosomal particles of Krebs II mouse ascites-tumour cells	J. Schuck, G. Reichert & O.-G. Issinger	1007–1009
Ribosomal core-particles as the target of ricin	M. Zamboni, G. Battelli, L. Montanaro & S. Sperti	1015–1017
Protein Turnover		
Relative synthesis of cardiac contractile proteins. Evidence for synthesis from the same precursor pool	C. D. Evans, S. S. Schreiber, M. Oratz & M. A. Rothschild	673–678
Effect of experimental hyperthyroidism on skeletal-muscle proteolysis	W. J. Carter, W. S. van der W. Benjamin & F. H. Faas	685–690
Studies *in vivo* of the tissue uptake, cellular distribution and catabolic turnover of exogenous glucocerebrosidase in rat	S. Morrone, P. G. Pentchev, J. Baynes & S. Thorpe	733–742
The cytochromes in microsomal fractions of germinating mung beans	G. A. F. Hendry, J. D. Houghton & O. T. G. Jones	743–751
Thyroid hormones and muscle protein turnover. The effect of thyroid-hormone deficiency and replacement in thyroidectomized and hypophysectomized rats	J. G. Brown, P. C. Bates, M. A. Holliday & D. J. Millward	771–782
The effect of protein depletion and repletion on muscle-protein turnover in the chick	M. L. MacDonald & R. W. Swick	811–819
Reappraisal of the quantitative importance of non-skeletal-muscle source of N^{τ}-methylhistidine in urine	C. I. Harris	1011–1014
Metabolism, Regulation and Control Processes		
Inhibition of H_2O_2 generation in rat liver mitochondria by radical quenchers and phenolic compounds	A. Swaroop & T. Ramasarma	657–665
Bacterial conversion of phenylalanine and aromatic carboxylic acids into dihydrodiols	W. Wegst, U. Tittmann, J. Eberspächer & F. Lingens	679–684
Effect of micromolar concentrations of free Ca^{2+} ions on pyruvate dehydrogenase interconversion in intact rat heart mitochondria	R. G. Hansford	721–732
Factors controlling the expressed activity of histidine ammonia-lyase in the epidermis and the resulting accumulation of urocanic acid	I. R. Scott	829–838
Control of chondroitin sulphate biosynthesis. β-D-Xylopyranosides as substrates for UDP-galactose: D-xylose transferase from embryonic-chicken cartilage	J. A. Robinson & H. C. Robinson	839–846
Purification and physiochemical characterization of a human cytotoxic factor produced by a human haemic cell line	H. Neumann & A. Karpas	847–856
Elimination and replenishment of tricarboxylic acid-cycle intermediates in myocardium	E. M. Nuutinen, K. J. Peuhkurinen, E. P. Pietiläinen, J. K. Hiltunen & I. E. Hassinen	867–875
Membrane-mediated control of hepatic β-hydroxy-β-methylglutaryl-coenzyme A reductase	A. B. Sipat & J. R. Sabine	889–893
Effects of lactation on L-leucine metabolism in the rat. Studies *in vivo* and *in vitro*	J. R. Viña & D. H. Williamson	941–947
Insulin inhibition of α-adrenergic actions in liver	J.-P. Dehaye, B. P. Hughes, P. F. Blackmore & J. H. Exton	949–956
Prostaglandin biosynthesis and lipolysis in subcellular fractions from rabbit kidney medulla	A. Erman & A. Raz	957–961
Dissociation of tumour-promoter-induced effects on prostaglandin release, polyamine synthesis and cell proliferation of 3T3 cells	R. Lanz & K. Brune	975–982

Vitamin K-dependent carboxylation and vitamin K epoxidation. Evidence that the warfarin-sensitive microsomal NAD(P)H dehydrogenase reduces vitamin K_1 in these reactions	R. WALLIN & J. W. SUTTIE	983–988
GDP binding to brown-adipose-tissue mitochondria of diabetic–obese (*db*/*db*) mice. Decreased binding in both the obese and pre-obese states	A. E. GOODBODY & P. TRAYHURN	1019–1022
Stimulation of glycolysis and accumulation of a stimulator of phosphofructokinase in hepatocytes incubated with vasopressin	L. HUE, E. VAN SCHAFTINGEN & P. F. BLACKMORE	1023–1026
Inhibition of cycloserine of mitochondrial and cytosolic aspartate aminotransferase in isolated rat hepatocytes	A. M. JANSKI & N. W. CORNELL	1027–1030
Cell Surfaces and Receptors		
The unoccupied nuclear oestradiol receptor in the rat uterus and hypothalamus during the oestrous cycle	S. THROWER, C. NEETHLING, J. O. WHITE & L. LIM	667–671
Phorbol esters induce synthesis of thromboplastin activity in human monocytes	T. LYBERG & H. PRYDZ	699–706
Effects of retinoids and phorbol esters on the sensitivity of different cell lines to the polypeptide toxins modeccin, abrin, ricin and diphtheria toxin	K. SANDVIG & S. OLSNES	821–827
Developmental Biochemistry		
Separation of haemopoietic cells for biochemical investigation. Preparation of erythroid and myeloid cells from human and laboratory-animal bone marrow and the separation of erythroblasts according to their state of maturation	F. L. HARRISON, T. M. BESWICK & C. J. CHESTERTON	789–796
Synthesis and secretion of alkaline phosphatase *in vitro* from first-trimester and term human placentas	H. GALSKI, S. E. FRIDOVICH, D. WEINSTEIN, N. DE GROOT, S. SEGAL, R. FOLMAN & A. A. HOCHBERG	857–866
Functional development of sex accessory organs of the male rat. Use of oestradiol benzoate to identify the neonatal period as critical for development of normal protein-synthetic and secretory capabilities	S. J. HIGGINS, D. E. BROOKS, F. M. FULLER, P. J. JACKSON & S. E. SMITH	895–905
The variation with age of nuclear phosphoproteins released during micrococcal-nuclease digestion and nucleosomal phosphoproteins in three cell types from rat liver	V. ZONGZA & A. P. MATHIAS	963–974
Membranes, Transport, Bioenergetics and Photosynthesis		
Intracellular ionic changes in normal and transformed human fibroblasts after extracellular Ca^{2+} deprivation	B. J. HAZELTON & J. T. TUPPER	707–711
Reactivity of photoreduced cytochrome aa_3 complexes with molecular oxygen	P. NICHOLLS & G. A. CHANADY	713–720
Studies on the binding of iron by rabbit intestinal microvillus membranes	T. M. COX & M. W. O'DONNELL	753–759
Phospholipid requirements for the reconstitution of Complex-III vesicles exhibiting controlled electron transport	B. D. NELSON & S. FLEISCHER	783–787
Potent inhibition of membrane-bound rat intestinal alkaline phosphatase by a new series of phosphate analogues	S. P. SHIRAZI, R. B. BEECHEY & P. J. BUTTERWORTH	797–802
The use of potent inhibitors of alkaline phosphatase to investigate the role of the enzyme in intestinal transport of inorganic phosphate	S. P. SHIRAZI, R. B. BEECHEY & P. J. BUTTERWORTH	803–809
Properties of oxygen-evolving Photosystem-II particles from *Phormidium laminosum*, a thermophilic blue–green alga	A. C. STEWART & D. S. BENDALL	877–887
Respiration-linked proton translocation in the obligate methylotroph *Methylophilus methylotrophus*	M. J. DAWSON & C. W. JONES	915–924
Stimulation of calcium-ion efflux from liver mitochondria by sodium ions and its response to ADP and energy state	J. J. A. HEFFRON & E. J. HARRIS	925–929
